

AGENDA

SEPTEMBER 26, 2023

7:00 P.M.

I. Welcome by Mayor to attendees.

II. Call to Order.

Board of Trustees - St. Paul's Work Session

The three (3) presenters will address the topics as stated below.

Residents are encouraged to submit questions in advance of the Work Session via email to: stpaulsquestions@gardencityny.net to be addressed by the Presenters at the Meeting. Question Cards will be available for residents during the Meeting for residents to submit additional questions, which may be addressed by the Presenters at the Meeting or, in writing to the Board of Trustees after the Meeting, if additional time is needed to prepare a response.

1. Irene Woo, Village Treasurer - Current State of Village Bonding, Credit Rating Discussion, When the Village Typically Issues Bonds, and Notes vs. Bonds.
2. Robert P. Smith, Esq. Village Bond Counsel - NYS Local Finance Law, Municipal Bond Issuance Process, Funding Alternatives.
3. Richard Tortora, Esq. & Diana Castaneda - Capital Market Advisors - How Impact to Taxpayers is Determined, and A Look at the Numbers.

III. Adjournment.

Information Session on St. Paul's School Financing

Village of Garden City

New York

September 26, 2023

Current Tax Supported Debt Outstanding

- The Village currently has **\$25,129,033⁽¹⁾** of general obligation bonds outstanding comprised of the following series:
 - 2012, 2014, 2015 A, 2015 Series B, 2016, 2018 Series A, 2020 Series A, 2021 Series A and 2021 Series B Refunding Bonds
- The **Village expects to issue approximately \$13,000,000⁽¹⁾** of general obligation bonds in the 2024 fiscal year. These bonds are currently authorized but unissued and will likely cause only a nominal increase, if any, to the Village's current tax levy.

Current Annual Village Tax Burden for an Average Home

2024 Assessed Value	2024 Tax Levy	Tax Rate per \$1,000 AV	Average Home AV ⁽²⁾	Current Annual Tax For Average Home
\$ 106,180,705	\$ 53,273,508	\$ 499.78	\$ 18,300	\$ 9,145.94

⁽¹⁾ Excludes Enterprise Fund debt.

⁽²⁾ The assessed value for each property within the Village can be found at: <https://www.gardencityny.net/432/2023-Final-Assessment-Roll>

Limitations on Village General Obligation Debt Issuance

- Purpose
 - Municipal purposes, per NYS Constitution and statutes
- Amount
 - Constitutional debt limit
- Term
 - Period of probable usefulness
- Method of Amortization
 - 50% rule
 - Level debt service

General Obligation Bond Authorization Process

- Contents of a Bond Resolution
 - Object or purpose
 - Estimated maximum cost of the project
 - Principal amount of bonds authorized
 - Period of probable usefulness
- Board Vote
 - 2/3 vote (in general)
 - 3/5 vote (mandatory referendum)

Permissive/Mandatory Referendum

- Applicable Where Maximum Maturity Exceeds 5 Years
- Permissive Referendum
 - Public vote is held if a petition is received within 30 days
 - Petition must contain signatures of at least 20% of the registered voters in the Village
 - Public vote to be held on the question of authorizing the bonds within 10 to 60 days (or at general Village election)
- Mandatory Referendum
 - Public vote is held on Board's motion (no petition)

Statute of Limitations

- Special “Estoppel” Publication Authorized By Statute
- Publication Commences a Special 20-Day Statute of Limitations Period

Federal Tax Exemption

- Village Bonds Generally Qualify As Tax-Exempt Bonds
 - The holder of the bonds is not required to pay tax on interest income received with respect to the bonds.
 - Interest rate for tax-exempt bonds is generally lower than for taxable bonds
- Private Use Test (use of bond-financed facility)
 - In general, no more than 10% of the bond-financed facility can be used by a private entity. Under certain circumstances the limitation is 5%
- Private Payments Test (source of debt service payments)
 - In general, no more than 10% of the funds used to pay debt service can be obtained from a private entity

Financing Scenarios: Adaptive Reuse, Facadism, or Demolition

- **Adaptive reuse or the “facadism” of St. Paul’s School:**
 - a) **Issue 15-year general obligation bonds.** The period of probable usefulness (“PPU”) for Class B reconstruction is limited to 15 years by NYS Local Finance Law. The Village would be required to repay all principal and interest on related debt within that timeframe.
 - b) **Issue 30-year general obligation bonds by pursuing special legislative approval to extend the PPU for the debt issued to fund the project.** The Village would then be able to repay all principal and interest on debt issued to fund the project over 30 years.
 - c) **Issue 30-year lease-revenue bonds.** A potential structure would have the Village enter into a sale/lease-back agreement with a third-party, not-for-profit entity (such entity would be created and controlled by the Village). The bonds would be special obligations of the entity, issued through a conduit issuer such as Nassau County IDA, payable from lease payments⁽¹⁾ appropriated by the Village to the entity.
- **Demolition and removal of the St. Paul’s School:**
 - a) **Issue 10-year general obligation bonds.** The PPU for demolition is limited to 10 years by NYS Local Finance Law. The Village would be required to repay all principal and interest on related debt within that timeframe.
- **The financial analysis of these scenarios does not incorporate any fee revenues which may materialize from the use of the St. Paul’s facility following adaptive reuse or facadism, nor from the use of land following demolition.**

Adaptive Reuse or Facadism

General Obligation Bonds issued by the Village for 15 years

- The issuance would benefit from the Village's "Aaa" rating which would attract the lowest available interest rates via a competitive sale.

*Rate assumption: 2025 Bonds 4.20%,
Prevailing "AAA" rate + 0.80% (as of 9/21/23)*

- Issued to finance \$50 million of construction
- Total interest cost estimate: \$18,908,913
- Final Bond maturity in 2040

Pros

- Low cost of capital, low costs of issuance and low interest expense over the life of the debt.
- No special legislation would be required.
- Village retains control over the timing and structure of the project funding.

Cons

- Village is limited to 15-year amortization
- Tax impact to residents is severe due to the relatively short-term of debt.

Impact to Village Tax Bill

Per \$1,000 of Assessed Value of Home

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 42.89	8.58%

Home assessed at \$12,200

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 523.20	8.58%

Home assessed at \$18,300

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 784.80	8.58%

Home assessed at \$24,400

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 1,046.40	8.58%

Adaptive Reuse or Facadism

General Obligation Bonds issued by the Village for 30 years (Special Legislation Required)

- The issuance would benefit from the Village's "Aaa" rating which would attract the lowest available interest rates via a competitive sale.

Rates assumption: 2025 Bonds 4.73%

Prevailing "AAA" rate + 0.80% (as of 9/21/23)

- Issued to finance \$50 million of construction**
- Total interest cost estimate: \$45,019,438**
- Final Bond maturity in 2055**

Pros

- Reduced annual tax impact resulting from longer principal amortization.
- Low cost of capital, low costs of issuance and low interest expense over the life of the debt.
- Village retains control over the timing and structure of the project funding.

Cons

- The Village would require special state legislation authorizing the issuance of 30-year bonds. The ability to secure the special legislation is not guaranteed and would be time consuming.

Impact to Village Tax Bill

Per \$1,000 of Assessed Value of Home

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 29.65	5.93%

Home assessed at \$12,200

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 361.71	5.93%

Home assessed at \$18,300

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 542.56	5.93%

Home assessed at \$24,400

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 723.42	5.93%

Adaptive Reuse or Facadism

30-year Sale/Lease Back issued via a Conduit Issuer

- The Village would sell the St. Paul's property to an industrial development agency (IDA) or not-for-profit entity (to be created) that would then lease the property back to the Village.
- The bonds would be payable solely from lease payments **subject to appropriation**, by the Village. Due to the appropriation pledge, the issuance would price at "Aa" interest rates.

Rates assumption: 2025 Bonds: 5.48%

Prevailing "AA" rate + 1.30% (as of 9/21/23)

- **Issued to finance \$50 million of construction**
- **Total interest cost estimate: \$54,066,913**
- **Final Bond maturity in 2055**
- The Village is assuming public/recreational use of the facility, the structure might be impacted should the Village decide to use the building for private use.

Pros

- Reduced annual tax impact resulting from longer principal amortization.
- Debt related to this structure would not be a direct obligation of the Village and would not impact the constitutional debt limit of the Village.
- Not constrained by the local finance law and can be structured for an extended PPU.

Cons

- This structure would incur additional costs including an annual administrative fee, additional issuance costs including conduit issuance fee and an additional layer of lawyers and other professionals.
- **This structure would likely require the subject property in its current state to appraise at an amount equal to or greater than the final bonding amount.**
- The Village would also be subject to additional administrative requirements and potential delays in receiving funds.

Impact to Village Tax Bill

Per \$1,000 of Assessed Value of Home

Annual Increase vs 2023-2024	% Annual Increase vs 2023-2024
\$ 32.72	6.55%

\$ 798.30	6.55%

Demolition

General Obligation Bonds issued by the Village for 10 years

- The issuance would benefit from the Village's "Aaa" rating which would attract the lowest available interest rates via a competitive sale.

Rate assumption: 2025 Bonds 4.02%,

Prevailing "AAA" rate + 0.80% (as of 9/21/23)

- Issued to finance \$13 million of demolition
- Total interest cost estimate: \$3,674,500
- Final Bond maturity in 2035

Pros

- This structure would result in the lowest cost of capital, lowest costs of issuance and lowest interest expense over the life of the debt.
- No special legislation would be required.
- Village retains control over the timing and structure of the project funding.

Cons

- Village is limited to 10-year amortization
- Tax impact is proportionately higher due to the short-term of debt.

⁽¹⁾ Excludes additional costs associated with O&M of the facility. See Slide 16 for additional impact related to such costs.

Operating & Maintenance Costs

- If the Village selects to update the facility, or build a new one, it will incur additional costs related to the O&M of such facility.
- That amount has been estimated to range between \$1MM and \$2MM annually, the tax impact of such range is outlined below.

Impact to Village Tax Bill (compared to FY 2022/23 Taxes)

Annual O&M Cost	Assessed Value of Home					% Increase
	Per \$1,000	\$12,200	\$18,300	\$24,400		
\$1,000,000	\$ 9.38	\$ 114.45	\$ 171.68	\$ 228.91		1.88%
\$1,500,000	\$ 14.13	\$ 171.68	\$ 257.52	\$ 343.36		2.82%
\$2,000,000	\$ 18.84	\$ 228.91	\$ 343.36	\$ 457.81		3.75%

Credit Quality and Cost of Capital

- A jurisdiction's credit rating directly impacts cost of capital.
- The Village's "Aaa" rated general obligation bonds price in line with the "AAA" Municipal Market Data scale.
- The Village's financial position is healthy with ample reserves and liquidity relative to "Aaa" rated peers.
- Village debt levels are 23% above "Aaa" Medians as of year end 2022.
- The Village's strong economy can sustain additional tax supported debt as contemplated with the St. Paul's financing scenarios.
