**SURVEY 123**

Creighton Manning, who completed a traffic calming study in the Central section, has been hired to study the East, West and Estates sections to evaluate and make recommendations on traffic calming measures to address the many traffic complaints received by the Village every week. The study will look at possible treatments for all the types of roadways in the Village but the recommendations will focus on Village-owned streets. Residents are encouraged to get involved in this important study and provide valuable input to ensure its success. The primary mechanism for feedback during the study will be the use of an online mapping application called Survey 123. The site allows residents to "drop pins" in specific locations and select from a drop down list of issues they see such as speeding, dangerous driving, etc. [SURVEY 123](#) site will be live from the start of the study for roughly a month. More information can be found at [www.gardencitytrafficcalming.com](http://www.gardencitytrafficcalming.com).
