#### DESCRIPTION OF PROJECT:

Future year budgets include department vehicles for staff to perform required title duties. Inspections are performed daily and in all weather conditions. As per the Village shop, amounts per year include the required light package for street safety and a 3% increase.

#### PURPOSE AND JUSTIFICATION:

To provide updated vehicle to staff to perform their job duties. These purchases are to start releasing older models which require large maintenance and are not fuel efficient. Additionally to start allocating vehicles that are 4 wheel drive for all weather performance. Department staff are required to perform multiple inspections to meet NYS and Village compliance for all construction. Building Department staff also respond to emergencies and assist the Police and Fire Department on other matters relating to structures (Commercial and residential buildings ).

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

Vehicles are usually recycled by removing the oldest fleet for gas and maintenance reduction with newer models. The impact is a one-time upfront purchase cost. Cost to be offset by increased revenues and new application types, inspections fees, etc. Capital allotment to provide the all-wheel drive capabilities, fuel efficiency and lower maintenance cost for in warranty purchase. Long term savings with fuel efficiency and less maintenance for a newer model with less expensive replacement of parts when needed.

#### DESCRIPTION OF PROJECT:

Normal replacement program of Police service fleet. All prices have been based on previous years pricing plus recent inflation increases. A comprehensive emergency vehicle replacement schedule is essential in assisting the Department in their 24/7 emergency operation and maintaining quality response times. Where practical, Department is converting to Hybrid Vehicles.

#### PURPOSE AND JUSTIFICATION:

Unmarked vehicles, no longer suited for emergency use, are available for reassignment to other Village Departments. This reassignment of vehicles has proven to be very beneficial to the Village. These late model unmarked vehicles, while not viable for use during routine police functions, may be used effectively by an engineer, building department employee, water meter reader, etc. By replacing equipment at regular intervals, downtime due to mechanical failure is greatly reduced, as well as repair costs. This regular vehicle replacement rotation assists the Department to run effectively, and allows officers to respond to emergency calls without unnecessary delays due to mechanical deficiencies and/or breakdowns. The new interceptors are equipped with all wheel drive and function well in adverse weather conditions.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

Older marked vehicles are utilized for parking enforcement in an effort to reduce the amount of newly requested police vehicles each year. In addition, utilizing older vehicles for parking enforcement extends the amount of years the Department keeps these vehicles in service. New Hybrid vehicles increase fuel efficiency, reduce gasoline usage, and reduce harmful emissions.

#### DESCRIPTION OF PROJECT:

Annual replacement of computer servers and mobile data computer systems. New mobile data computer systems are equipped with thermal imaging cameras to assist in day/night investigations. Police Aide Vehicles are now equipped with mobile data computer systems which allows for increased patrol time, productivity, and efficiency.

#### PURPOSE AND JUSTIFICATION:

The goal of a comprehensive, cyclical plan of improvement and replacement insures the highest quality of computer service on an ongoing basis with relatively stable budgeting. In addition, this approach is being extended to the lap-top mobile units, LPR and Livescan systems.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

Continual rotational replacement insures maximum availability while keeping equipment under original warranty. The Village purchases only name brand units with three year on-site service from authorized State contract vendors, when available. The license plate reader system assists the department in the arrests of wanted subjects and detection of crimes/traffic violations as well as removing unsafe vehicles from roadways.

\*System consists of servers, workstations, Headquarters and mobile printers, ID digital cameras, routers, hubs, mobile pc's, firewalls, scanners, a livescan unit, and radio/phone recording equipments.

#### DESCRIPTION OF PROJECT:

Purchase of additional interoperable radio equipment.

#### PURPOSE AND JUSTIFICATION:

The Department has transitioned to the Nassau County Police Radio System which provides interoperable encrypted communications between participating federal, state, and local agencies. Interoperability among law enforcement agencies is crucial in the current environment where national security and disaster preparedness is a necessity. The Department is undergoing a process of purchasing tri-band radios to be compatible with the older VHF backup system, the current 500 MHz system and the future Nassau County 800 MHz system. It is the position of this Department that even with an interoperable communications system, the original Department police radio system be maintained as a back-up communication system. The Department also provides radios to the Department's Ambulance service to maximize communications between the two agencies. To maximize operations, particularly during serious incidents and large scale events, the department's goal is to have each officer assigned a radio.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

The Department's interoperable system, consisting of two base stations, 40 portable radios, and 33 mobile radios, has proven beneficial during emergency situations that required working with, and coordinating with multiple law enforcement agencies as well as fire departments and ambulance services.

**DESCRIPTION OF PROJECT:**

Vehicle and specialized equipment replacement is critical to the consistent delivery of maintenance services throughout Village recreation facilities and passive parks. Less investment is required for sophisticated mowers with the outsourcing of passive park maintenance, but some replacements are still required. Snow removal equipment is badly needed with our increased snow responsibilities.

**PURPOSE AND JUSTIFICATION:**

The existing fleet of 25 over the road vehicles used in the daily delivery of a variety of grounds maintenance tasks, including snow removal, contains many vehicles with high mileage and severe rusting from age. Older vehicles require continuous costly repairs resulting in extended down time.

#### DESCRIPTION OF PROJECT:

This project is to scan and convert Village Records from microfilm and paper to digital format. The records identified for conversion to digital form include Board of Trustees Minute Books, Planning Commission Books, Zoning Board of Appeals Minute Books and Board of Trustees Transcript Books (Public Hearings), as well as some active records; permanent records of varying age; archived employee files; various Village Department records, the majority of these records being permanent records. WILL USE AVAILABLE FUNDING FROM 2020-21 TO FUND PROJECT IN FY2021-22 and FY2022-23

#### PURPOSE AND JUSTIFICATION:

The above records are housed within six areas of the Village including Village Hall Vault A, Vault B, the Cage, Storage Room B, which in aggregate encompass over approximately 2,400 boxes, 14 lateral cabinets, business documents, large format plans and 390 rolls of 35mm film. Having the files dispersed throughout Village facilities makes accessing and providing requested information difficult, time consuming and cumbersome.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

While the initial cost to scan and digitalize these records is to not only safeguard them from the elements, but house them electronically. This fulfills an objective for the records management project but also one within the establishment and continuation of a Disaster Recovery initiative. By creating a digital copy of these files it will enable the management system to be established in an electronic environment, not only on the Village's physical server, which is routinely backed up, but when the Village decides to invest in cloud storage the copying and placement/transferring of these records will be easily facilitated. It is expected that this solution will be a long-term time saving solution providing cost savings through the efficiency and effectiveness of record availability and transparency.

**DESCRIPTION OF PROJECT:**

To implement a new General Ledger System. The current General Ledger System (Keystone) was originally implemented in 1989, and was later upgraded to a GUI version in 1997. Amount is a placeholder for future project.

**PURPOSE AND JUSTIFICATION:**

In a continued effort to improve financial analysis and efficiencies, a new general ledger system is needed that will include robust budgeting and financial reporting capabilities that do not exist today. Upgrading our main financial system will improve our ability to produce Reporting and Analysis, Budgeting and Forecasting in a more timely and efficient manner.

#### DESCRIPTION OF PROJECT:

**2022/23** - During the 2022/23 Fiscal Year the actual roads being constructed are the backlog from the 2021/22 paving program. In 2022/23 the \$250K will be used as design funding for the repaving of Stewart Avenue between Franklin Avenue and Clinton Avenue. Any remaining design funds will be used to design additional roads that will be paved in subsequent years. Going forward design funding for subsequent year road repaving will be budgeted to design for the next Fiscal Year so that the cost are estimates and more accurate since they will be based on drawn specifications thereby affording the Village better pricing and more importantly we should be able to begin the repaving earlier in the season with the expectation of completion in the same Fiscal Year.

#### PURPOSE AND JUSTIFICATION:

There are approximately 214 lane miles of Village roads. In order to keep these roads in good condition, they should be maintained on a 20-year cycle with ten miles being repaired each year. Over the previous 4 years the Village has maintained an average of 10.85 miles repaired a year. In addition there are 45 parking lot miles which carry a much more significant cost to repair and do bring down the average lane miles repaired per year.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

Repairing road before failure saves money in terms of future expenditures. Over the first 75% of the life of a road, there is a 40% loss in the quality of the road. However, in just the next 12 years of the life of the road, there can be another 40% loss in quality. At this point, the road deteriorates very rapidly. Once a road reaches this point, it can cost 150% to 180% more to make repairs.

#### DESCRIPTION OF PROJECT:

We have 27 chemical pumps throughout the system at the well sites. These pumps, with the exception of three, are 10 or more years old. A large number of these chemical pumps are coming to the end of their life span. We were able to obtain the pumps this year at a significantly lower price than expected, enabling us to accelerate this program by purchasing 7/year.

#### PURPOSE AND JUSTIFICATION:

These pumps ensure that the proper amount of chemicals are added to the system for the proper treatment of the water.

#### IMPACT OF PROJECT ON OPERATING REVENUES/EXPENDITURES

Preventative maintenance to prevent much larger catastrophic problems.
