

If the Proposed Action is implemented, the St. Paul's Main Building will be lost, resulting in a significant adverse impact on historic resources, aesthetic resources, and community character. The loss of this historic and aesthetic resource could be partially mitigated by implementation of one or more mitigation options, presented in Chapter 10, "Mitigation." Unless the Proposed Action were abandoned and another alternative other than the "No Action" alternative chosen, there would be an unavoidable significant adverse impact on historic resources, aesthetic resources, and community character.
