1780 Broadway

Deconstruction engineering services for the removal of the interior portions of the structure phased in conjunction with the renovation work. Scope included design of temporary bracing (12-stories) and analysis to determine if the building was structurally adequate to withstand lateral loads in its partially deconstructed condition.

Thornton Tomasetti

1552 Broadway

Deconstruction engineering services for the removal of the interior portions of the structure phased in conjunction with the renovation work. Scope included design of temporary bracing (3/4-stories) and analysis to determine if the building was structurally adequate to withstand lateral loads in its partially deconstructed condition.
