**Re: Request for Proposal
Garden City Truck Routing Feasibility Study
Garden City, New York 11530**

Introduction

The Incorporated Village of Garden City, New York (the “Village”), is currently seeking proposals from qualified individuals and entities authorized to do business in the State of New York to provide professional engineering services to evaluate the feasibility of implementing bi-directional truck restrictions along the Clinton Road, Washington Avenue, Franklin Avenue, Nassau Boulevard, Eleventh Street, Cherry Valley Avenue and New Hyde Park Rd corridors within the Village of Garden City.

The Vendor shall evaluate and provide feasibility reports for each individual route and provide recommendations for a full truck restriction or limited restrictions during the daytime or nighttime hours. The reports shall address the benefits and impacts to the resident and/or businesses within or adjacent to the Village of Garden City on each of the routes. The overarching study area is roughly bounded by the limits of the Village of Garden City, however may encompass an area bounded by the Long Island Expressway to the north, Peninsula Blvd / Hempstead Tpke to the south, Covert Ave to the west and Merrick Ave to the east.

This study will be a collaborative effort to reduce truck routing through the Village of Garden City and reduce the negative impacts that truck traffic can have within the Village of Garden City.

The Village is committed to a policy of equal opportunity and does not discriminate against Vendors on the basis of age, sex, sexual orientation, race, color, creed, religion, ethnicity, national origin, disability, marital status, familial status, veteran status or any other basis protected under federal, state and local laws, regulations and ordinances.

Anticipated Proposal Schedule

RFP Issue Date:	January 26, 2024
Proposal Due Date:	February 15, 2024
Oral Presentation (if necessary):	TBD
Award Date:	TBD

*Dates indicated above are subject to change at the sole discretion of the Village.

Background

The Village of Garden City is located within the center of Nassau County and is uniquely positioned in such a manner that it has five desirable north-south trucking routes that traverse through the Village connecting the south shore and the Long Island Expressway. Traffic volumes and truck traffic have increased over the years and has had a negative impact on the quality of life for residents of Garden City. An effective truck route network can reduce community impacts by directing trucks away from residential neighborhoods or sensitive areas.

Scope of Services

The specific responsibilities and obligations of the Vendor are proposed to include, but not necessarily be limited to, those outlined below.

The selected Vendor will be responsible for providing all data collection, preliminary and final study development, and engineering services as required for the Garden City Truck Routing Feasibility Study. Each Vendor is expected to acquaint themselves to the project area at their own cost and expense prior to submitting their proposal.

- **Garden City Truck Routing Feasibility Study General Requirements:**

The Vendor shall:

1. Provide a project schedule with delivery milestone dates and monthly progress updates.
2. Communicate regularly with Village representatives for the project.
3. Attend meetings with Village representatives as required and provide all meeting materials, notices, attendance lists, minutes/summaries, etc.
4. Attend meetings and assist the Village in discussions on truck restrictions with officials from other municipalities as required and provide all meeting materials, notices, attendance lists, minutes/summaries, etc.
5. Identify and provide feasible solutions for related quality of life issues such as safety, noise, congestion, and pollution.
6. Be prepared to engage community leaders and other stakeholders in a dialogue about developing complementary outcomes for the environment and quality of life for the community and residents.
7. Provide one cohesive final report that is comprised of separate individual reports for each route identified above.

- **Existing Conditions:**

The selected Vendor shall attend a kick-off meeting with the Village of Garden City to review the overall feasibility report approach, project goals, objectives, schedule, and expectations. The selected Vendor shall assemble information on existing conditions including aerial photography sufficient for planning and conceptual development. The selected Vendor shall collect independent information, including truck traffic counts, and conduct a field review noting existing land use and transportation features in the study area. In some portions of the study area, restrictions established by localities change at jurisdictional borders. The Vendor shall review these restriction changes and determine the impact they would have on the Village implementing truck restrictions, such as giving trucks a turnoff prior to reaching the Village boundary, not having to make U-turns, etc.

- Objective:

Evaluate each of the routes individually and as an entire network in order to determine if the diversion of truck traffic from residential roads is permissible and feasible. Coordinated networks increase compliance with the law and communicate to the trucking industry which roads are best suited to accommodate their size and weight. Consideration shall be given to the impact on other roadways when a restriction is implemented on a certain roadway. The Vendor shall also evaluate impacts to the businesses within or adjacent to the Village of Garden City boundary on each of the routes. The final report shall be developed by taking into consideration safety issues, truck congestion, environmentally sensitive areas, quality of life, and environmental justice concerns to meet the vision and goals for each study area.

- Feasibility Reports:

The Garden City Truck Routing Feasibility Study shall be developed and analyzed to determine benefits and impacts for each of the routes individually as well as an entire network throughout the Village. The Vendor shall investigate the possibility of daytime and nighttime closures in addition to a full restriction of truck traffic.

The feasibility reports for each route shall address any impacts to businesses or residents inside or adjacent to the Village of Garden City.

The final report shall be accompanied by maps and a list of any proposed route changes.

Mandatory Proposal Requirements

All proposals must state the period for which the proposal shall remain in effect, i.e., how much time does the Village have to accept or reject the proposal under the terms proposed. Such period shall not be less than 180 (one hundred eighty) days from the proposal date.

The technical proposal, at a minimum, shall include: a description of the unique ability and/or experience of the proposing Vendor to provide the services outlined herein.

Substitutions shall be requested by the proposing Vendor in writing and shall be subject to approval by the Village. It shall be at the proposing Vendor's discretion whether to include within the proposal any additional information regarding the special experience or qualifications of the proposing Vendor or its key personnel that would further substantiate the capabilities of the proposing Vendor to fulfill the requirements of this RFP.

The Vendor shall provide all the necessary services, whether specifically mentioned herein or not, to complete this assignment. The Vendor assumes all risks regarding estimating the level of effort and labor hours and expenses required to complete all services to the satisfaction of the Village at the proposed cost.

The Vendor shall prepare and attach to this Agreement a Cost Proposal (**APPENDIX A**) for the proposed services as outlined in this Agreement.
