- **3/28** - Bond Resolution for Protection and Design Services and SEQR. The total cost of the bond for the St. Paul's, Protection and Design Services, including financing costs and additional contingencies for unforeseen expenses is estimated to be \$1,000,000. The engagement of qualified firms at the estimated maximum cost of \$500,000 to provide Engineering, Architectural, Construction Management and Related Services and advice for Assessment of Present Building Condition, Temporary Protection and Pre-schematic Design Services Relating to Improvements which may be made in the future to the St. Paul's Main Building, and also the Construction of Improvements at the estimated maximum cost of \$500,000 for Protection and Stabilization of the St. Paul's Main Building; the aggregate estimated maximum cost is \$1,000,000.

- **3/28** - Appropriation of Surplus - Select Construction Manager - Request authorization to appropriate \$250,000 from Surplus to Capital Projects Account, (to fund the St. Paul's Account), for professional fees and expenditures related to limited remedial and protective work of the building and to assist with the feasibility of the Proposed Concept Plan.
- **3/28** - Request authorization for the Village to execute agreements not to exceed \$250,000 (inclusive of fees and expenses) with vendors, including a Construction Manager (to be selected by the Board from amongst the responders to this Board's prior Request for Proposals) in connection with advice regarding the present physical condition of the St Paul's Building(s), the identification of work immediately necessary to stabilize same, and for such further services as may be subsequently authorized by this Board to coordinate rehabilitation and/or construction consistent with any adopted Concept Plan for future use of the building(s). The Village is contemplating the identification of a long-term re-adaptive use of the St. Paul's building(s). In connection with same, it is important to understand the current physical condition of the building(s) and to identify any short-term work needed to stabilize and protect same. The Village's architectural and engineering professionals have recommended hiring a professional construction manager who they will direct and coordinate for the stabilization of the building, creating environmental testing reports, protecting stained glass windows, recommending steps necessary to prevent ingress and water intrusion and address related issues of temporary protection which may be required. To that end, the Village has previously promulgated a Request for Proposals ("RFPs") from professional firms to act as "Construction Managers," i.e., to assess the current building conditions, identify necessary immediate stabilization and environmental abatement work, and to coordinate and provide expert guidance to the Board of Trustees for the development of any plan for rehabilitation of the buildings consistent with any potential plan for re-use, if any such plan is hereafter adopted by this Board. From amongst the responders to the RFP, it is anticipated that the Board will make a selection between CNY Group, and Triton Construction Corporation, each of which has a proposal on file with the Village Clerk and has been publicly presented to the Board of Trustees; each of which has demonstrated professional expertise in this area of construction management. Adoption of this Resolution would include a direction to Counsel to prepare a contract consistent with the Proposal selected.
- **04/08** - Select St. Paul's Construction Manager - CNY for stabilization and planning related to development of a potential St. Paul's Concept Plan. The Board of Trustees has previously received Requests For Proposals ("RFPs") and authorized the selection and retention of a construction manager for stabilization and planning related to development of a potential St. Paul's Concept Plan from amongst Responders. The authorization and retention is for initial phase stabilization and planning efforts. Board of Trustees authorize the selection and retention of CNY, 214 West 39th Street New York, New York, which was one of the two finalists from the RFP process.
- **06/06** - Construction Fence - Board approves the erection of a temporary construction fence at St Paul's and authorizing the Department of Public Works to prepare specifications for the erection of a construction fence around St. Paul's (and to publish same for competitive bids, and to take all other customarily steps required for a public works project) for the purpose of providing a safety barrier under a "temporary protection plan" being developed to preserve and protect the St. Paul's buildings. Through its previously selected vendor, CNY, a short-term "temporary protection plan" is being developed to preserve and protect

the physical buildings at the St Paul's site for whatever purpose is eventually selected by this Board. Whatever the eventual usage, however, certain "preserve and protect" work must be accomplished under any temporary protection plan to secure the buildings, and the erection of a construction fence around the property is a necessary preliminary step to the temporary protection and any re-purposing of the buildings. Funds in the Capital Projects Account.

- **06/20** - Furnish and Install Fencing - St. Paul's Building - RFC Residential Fences, Corp.
