

September 2018

GARDEN CITY & GARDEN CITY PARK

The LIRR Expansion Project from Floral Park to Hicksville, one of the region's most significant transportation infrastructure projects, is now underway throughout the communities along a nearly ten mile stretch of mainline track.

During the month of September, you will see construction crews performing work in Garden City and Garden City Park. Specifically, crews will continue to conduct pre-construction inspections of the existing conditions of structures surrounding worksites. Along the right-of-way, crews will also clear overgrown vegetation. By way of explanation:

Vegetation Clearing and Removal

- Along the right-of-way, crews will clear overgrown vegetation to allow for temporary utility relocation
- This work will include tree removal and stump grinding along the right-of-way near the Merillon Avenue Station

Existing Structure Surveys

- Property located within a specified radius of anticipated construction work requires a pre-construction photo inspection
- The survey is conducted to ensure the property is protected in the unlikely event of any damage
- Vibranalysis Inc., an independent consulting firm, will perform the survey
- Inspection consists of photographs and written documentation, recording the existing conditions of the interiors and exteriors of the structures surrounding the site
